Extra-cushioning insoles are added to enhance comfort and feel. The sneakers' durability and traction are ideal for orthopedic uses. Looking for more great shoe recommendations? Find cross-training shoes, workout shoes, and more on our clothes and accessories hub. Editors' Recommendations There is no one-size-fits-all when it comes to footwear (that would have saved us a lot of time on our online shoe returns). So, wearing a size eight in Docs doesn't necessarily mean you're the same size in shoes from other brands. Apart from the brand, the material plays into the fit, as well as if the shoe is marked for "men" or for "women." Obviously, shoes don't have sex assigned at birth, so those measurements mean nothing in regards to which shoe you "should" wear. But, until brands stop categorizing their sizes according to a limited gender binary, it's helpful to know how to convert the sizes and how best to fit your foot as you shop. So if you're shopping for a new pair of shoes, whether it be oxfords or loafers, we're here to help. Once you find a style that suits your taste, the next step is to ensure your comfort. Below are a few guidelines to finding the best fit. Keep reading for how to convert men's and women's shoe sizes. Knowing your companion shoe size can expand your options, not only in terms of style but also if you struggle with finding shoes that fit. This is especially true because "men's" shoes usually come in longer and wider styles, while "women's" shoes come in sizes that tend to be shorter and more narrow. A size nine in a "men's" shoe is not the same as a nine in "women's." However, the formula for converting those sizes from one to the other is relatively straightforward. To get your "men's" shoe size, subtract two sizes from the U.S. "women's" shoe size From U.S. "men's" sizing, add a size and a half to determine your "men's" sneaker size From U.S. "men's" sizing, add a size and a half to determine your size in U.S. "women's" sneakers (i.e a U.S. "women's" size eight is a U.S. "men's" six) Size conversion for sneakers is slightly different but still won't require that you whip out the calculator. From U.S. "women's" sizing, simply subtract a size and a half to determine your "men's" sneaker size From U.S. "men's" sizing, add a size and a half to determine your size in U.S. "women's" sneakers (i.e a U.S. "women's" size eight will find a comfortable fit in a U.S. "men's" size six and a half sneaker) Klaus Vedfelt/Getty Images There's no doubt that these conversion guidelines come in handy, but it's worth noting it's a rule of thumb and not an exact science. Shoe sizes can vary quite a bit from brand to brand and even between styles by the same company. Trying on a pair of shoes in the store is still the best way to nail the right size. But in case you can't get to the store—or you've just succumbed to the convenience of online shopping—there's a solution: Simply measure your feet and then compare measurements against the shoe size chart provided on the brand's website. Keep in mind that it's not just about length, but width, as well. You might find you need to go down an additional half or full size if the shoe is too broad. If you can, consider ordering a pair of shoes in two different sizes to get the fit that's not too big and not too small, but just right. Make sure to check out the retailer's return policy first before you go ordering away (a lesson we learned the hard way). Mike Harrington/Getty Images With coronavirus sweeping the UK and the government advising Britons to implement social distancing, our visits to country pubs and village tea rooms are off the table for the time being. The pandemic might be affecting our holiday plans and get-togethers with friends, but it doesn't have to mean putting a stop to all the things you love.While COVID-19 updates take over the news headlines, there's never been a better time to start taking care of your mental health and the answer could lie in the great outdoors. Despite everyone being advised to reduce social interaction during the crisis, walks are still recommended for both your physical and mental wellbeing (providing you keep a distance of more than two metres from others). Visiting a secluded beach or crowd-free park will help you stretch your legs during the coronavirus outbreak. It's also a good time to invest in a quality pair of walking shoes as you make the most of nature.To help you pick the best walking shoes for you, we've done the research to cover your every need, whether you're after men's or women's, waterproof or lightweight, leather or eco-friendly styles.Here are 2020's best walking shoes that you can buy right now.Women's walking shoesBest all-round walking shoes KEEN KEEN's new women-specific Terradora II Waterproof Hiking Trainers were 'hiked' up to deliver extra comfort, performance and traction for an all-round walking shoe that can keep you going all day. It's lightweight, waterproof and provides a locked-in feel too. Plus, it's sustainable, created with a safe PFC-free durable water repellent and infused with eco anti-odour treatment that uses probiotics rather than chemical alternatives that can be harmful to the environment.Best walking shoes for comfort Merrell Merrell is known for its high-performance styles and its suede Alvestone with Gore-Tex technology offers all-day comfort and full-foot protection, however long you're planning to spend outdoors. Ideal for a day in the woods, the mountains and other wild spots, it's waterproof, exceptionally breathable and absorbs shock with the Merrell Air Cushion in the heel. There's even a removable contoured footbed for flexible support.Best waterproof walking shoes The North Face Waterproof shoes often mean extra weight but not with The North Face's Activist Futurelight. Taking you from urban parks to countryside paths and mountain trails, it's developed with a Futurelight membrane that allows the shoe to breathe as hard as you do when pacing up a steep ascent. There's a gusseted tongue and OrthoLite insoles that deliver all-day comfort, while the lightweight and washable insoles retain their cushioning power long term, even if you're wearing them everyday.Best lightweight walking shoes Skechers These walking shoes from Skechers were designed for walking in absolute comfort or a cushion of air, if you like. The GOWalk Air has lightweight, responsive ULTRA GO cushioning and visible air-cushioned dual density technology to give you an extra spring in your step. We like the slip-on style and soft-woven stretch knit mesh fabric upper too. At just 312g in weight, they're some of the best lightweight walking shoes available. Best leather walking shoes Brasher For a classic style you'll love forever, Brasher's premium leather Country Roamer Walking Shoes are just the answer to unrivalled comfort and quality. The leather upper provides a durable exterior and waterproof performance for whatever the weather brings this season. There's also a cushioned underfoot for comfort, a Vibram outsole for unbeatable grip on any terrain, whether wet or rocky, plus Brasher is a brand that counts Kate Middleton as a fan.Men's walking shoesBest all-round walking shoes Arc'teryx For a style that's light enough to keep you fast on your feet, Arc'teryx's Aerios FL GTX is one of the best men's walking shoes for all-round performance. It's durable and protective enough for varied terrains and there's minimal friction. A Gore-Tex membrane gives waterproof protection, while comfort and breathability feature too. Thanks to the Vibram Megagrip outsole, you can walk, hike and trek to your heart's content.Best walking shoes for comfort Asics Whether you're after stylish black walking shoes or a design that will allow you to take a long-distance walk, Asics' Gel-Odyssey is designed primarily with comfort in mind. It offers all the support you need for a short walk in the park or longer strolls through national parks. The rearfoot GEL and SpEVA foam midsole give your feet ultimate cushioning, while the midfoot Trusstic gives stability on tricky surfaces. You'll love the soft and breathable leather upper, along with the extra comfort from the internal heel counter, comfort sockliner and stitch-down toe reinforcement.Best waterproof walking shoes Berghaus With its 100% waterproof guarantee thanks to Gore-Tex technology plus the robust design, Berghaus' Fellmaster Active Gore-Tex Shoes are some of the best walking shoes around. The high-quality, breathable lining ensures you won't endure soggy socks, while your feet are held firmly in place thanks to the tough yet comfy nubuck. There's enhanced heel and toe protection from the rubber caps, making these shoes hard to beat.Best lightweight walking shoes Columbia Weighing 358g, Columbia's Peakfreak XCRSN II XCEL Low OutDry Trail Shoe is loved for its modern design and lightweight construction, with one Amazon reviewer saying it is the "best pair I have ever owned". Waterproof, versatile and practically indestructible, the super-light walking shoe has a textile upper with welded overlays to keep the weight down and a Techlite midsole for long-lasting comfort.Best leather walking shoes Timberland Built for rugged, rough terrain and withstanding the wettest conditions, Timberland's Mt. Major shoe is made with premium full-grain leather from a Leather Working Group silver-rated sustainable tannery and synthetic leather. It's one of the most durable for walkers, with its Gore-Tex construction and keeps you both dry and comfortable. The leather walking shoes' fully gusseted tongue keeps rain and dirt out, while the speed lace hardware with hooks are rustproof to make them last.
