Vehicle electronics can be used to start the vehicle. Once the use of these systems may result in the vehicle starting Key Sentry has been programmed for a vehicle, problems and loss of security protection. Topics that you know before starting your Vehicle 17 Sentry Key Programming Turn the ignition switch to the LOCK position and you can program new keys to the system if you have two delete the second key. Válido Válido. Keys when making the next proce- 4. 18 things you should know before starting your VEHICLE NOTE: If you lose a scheduled key, see your ALARM authorized VEHICLE security system — IF distributor so that all remaining keys will be erased from the memory of the ses tems. This will prevent the lost key from starting The vehicle's security alarm system monitors the doors of your vehicle. Things you should know before you start your VEHICLE 19 To Arrange the System: NOTE: During the 16th second armor period, if a door is 1. Remove the switch on and exit open or the switch on is activated, the vehicle system. 20 Things you should know before starting your VEHICLE NOTE: armed when the battery is reconnected. The exterior The key cylinder of the driver's door and the log button on the lights will turn on, and the horn will ring. If this happens, the RKE transmitter cannot arm or disarm the system. Things to know before you start your VEHICLE 21 The interior lights will fade after about 30 seconds NOTE: or they will fade immediately once the on The transmission line should not be blocked with the switch is turned on. Metal objects when using the RKE transmitter. 22 things to know before starting your vehicle to unlock the doors For vehicles not equipped with the EVIC, press and release the UNLOCK button in the following RKE procedure: transmitter once to unlock the driver's door, or twice to 1. Press and hold the UNLOCK button on a programmed sound. Press the UNLOCK button the RKE transmitter for at least four seconds, but not longer Vehicle safety alarm system. 24 things to know before you start your VEHICLE Lighted Focus â If the Sound Horn Equipped with Lock This feature activates the headlights for up to 90 seconds This feature will cause the horn to melt when the doors are unlocked Unlock The RKE transmitter. They are blocked with the RKE transmitter. Things you should know before starting your vehicle 25 2. Free both buttons at the same time. To unlock the trunk, press the trunk button on the RKE DOS transmitter 3. Test the function while off the vehicle, at times to unlock the trunk. Pressing the lock button on the RKE transmitter with the ignition in the locking position, and the key was deleted. 26 things you should know before starting your vehicle The panic alarm will be released for three minutes unless you do not touch the battery terminals that are on the back, turn off by pressing the pan button A second housing or the printed circuit board. Things you should know before starting your vehicle 27 2. Remove and replace the batteries with your fingers. Leather oils can cause the part responsible for compliance to deteriorate the battery. 28 things you should know before starting your vehicle remote entry transmission (RKE) to be equipped with A remote start. Mitter to start the engine conveniently from outside the remote start vehicle while safety is maintained. Page 31 Things that you discovered before start mode to exit the remote start mode to exit the remote start button before the end of the cycle of 15 minutes, press and release In the RKE transmitter twice. 30 things that you know before starting the locks of the vehicle doors. Things you should know Before you start your vehicle and lock your vehicle of the door down. Things you should know Before you start your vehicle 31 electric door locks Automatic door locks A door locks A door lock switch is located on the driver and passenger when it is enabled, your door automatic locks the door cut-off panel. Press this switch to lock or unlock Automatic Gates in the Exit Schedule 3. Press the power door UNLOCK switch to unlock The function of automatic unlocking of doors on output can be the doors. activated or deactivated or deactivated as follows: 4. A single bell will indicate the completion of the For vehicles equipped with the programming of the Electric Vehicle. MATTERS TO KNOW BEFORE YOUR VEHICLE 33 WINDOWS Window controls will work when the power switch is in the ON or ACC position, and when Power Windows and rear room windows. Page 36 34 MATTERS TO KNOW BEFORE YOUR Vehicle Smart Glass Function **Convertible only For vehicles not equipped with the electric vehicle The door window will be slightly reduced if it is an information center (EVIC), the door window will return and remain active for 45 seconds after the power switch reaches its full position after closing the door. Page 37 MATTERS TO KNOW BEFORE YOUR VEHICLE 35 To reactivate the power of the window, press the button (adjusting it to the position below). press and release the LOCK button again (adjusting it to the top position). 36 MATTERS TO KNOW BEFORE YOUR VEHICLE Wind Buffet The trunk release button on the Wind buffet can be described as the perception dashboard will be disabled if the vehicle pressure on the ears or a propeller Sound type opter on the is locked by pressing the power ears. MATTERS TO KNOW BEFORE YOUR VEHICLE 37 With the ignition on, the word "deck" will appear on the TRUNK SAFETY WARNING odometer indicating that the trunk is open. The El Advertising! The screen will reappear once the trunk is closed or if the shooting button is pressed. 38 things that I discovered before starting the trunk of its vehicle Emergency be discovered before starting your vehicle 39 Air bag Head bag assembly of the SUSPLEMPLEMAL FRONT: Front air bags have a dual-stage inflation designer. This allows the airbag to have different retract rates of the front seat strap that incorporate the pretension flexion that are based on the severity of the collision. 40 things you should know before starting your vehicle buckle even if you are an excellent driver, even normal conditions. However, in a collision, the belt will be made on short trips. Someone on the road can be a poor driver block and reduce the risk that its coup is the interior of the and causes a collision that includes it. Page 43 Things you should know before starting your vehicle 41 2. The security belt latch plate and with your belt in the wrong place you could make the strap is long enough to fit, insert the latch warning. Plate in the buckle until you hear a "selection". A belt that is fastened towards the incorrect buckle, will not protect you correctly. Page 45 Things you should know before starting your vehicle 43 Advertising! (Continued) a belt shoulder placed behind you will not protect you from injury during a collision. You are more likely to hit your head in a collision if you don't wear your shoulder belt. 44 things you should know before you start warning your vehicle! WARNING! A lap belt used too high may increase the risk that a worn or torn belt might be destroyed in a collision. The belt forces will not leave you without protection. Things to know before Aaffance your vehicle 45 2. Approximately 6 to 12 inches (15 to 30 cm) above the closing plate, in a collision. The pretensioners work for occupants of all sizes, grab and turn the 180ð tape to create a fold that includes those of child retention systems. Note: I am attentive to the safety belt warning light to turn on the dealer or by performing the following steps: while it is unbuttoned and turns off while the safety belt is rewered again. It may be necessary to partially retract the safety belt Note: Chrysler LLC does not recommend that you deactivate it after unbuttoning it. Alert Belt. Things to know before Aaffance Your Vehicle 47 4. Turn the ignition switch to the Lock position. How to participate in the automatic blocking mode Sonic bell will sound to mean that you have success- 1. Buckle the combination of the lap / shoulder band. Fully completed programming. 48 things to know before Aaffance Your vehicle Safety belts and pregnant women use the seat belt throughout the pregnancy. Keeping Mother Segura is using a security belt extender when you do not need to be the best way to keep the baby safe. Page 51 Issues that you know before Aaffance Your vehicle 49 The front airbags have a two-stage inflator designer. This can allow the airbag to have different inflation rates based on the severity of the collision and the occupant size. Advertising! Do not place anything in ni around the front covers of the airbags or try to open them manually. Page 52 50 Things to know before Aaffance Your vehicle Collisions, both the front airbags and the seats can be trig-Adventure! (Continued) Gereed. However, even in in which airbags do not hold portavasos or any other object at work, you need the seat belts to keep it on the right or around the door. Page 53 MATTERS TO KNOW BEFORE I CAN FIND YOUR VEHICLE 51 retentions or seat belt lifters. Old chil- 4. If your vehicle has airbags for seats, do not support against dren you do not use The restrictions or placement of the door belt, the airbags will be inflated forcily into the space driver seats must ride correctly on the back between you and the door. Page 54 52 Things You must Know Before You Begin Your Complement Vocabulary Seat Side (Thorax and Head) About! (Continued) Front impact sensors Being too close to the steering wheel or the instrument panel during the deployment of front airbag could cause secondary impact sensors (if equipped) serious injuries. Page 55 Things You must Know Before Beginning Your Vehicle 53 The first stage inflator is immediately activated during an impact of special Airbag Front Passenger characteristics that requires the deployment of Airbag. The moment of a new active front ventilation airbag is designed in the second stage determines whether the output force is to reduce the risk of occupants that may be out of low, medium or high. Page 56 54 Things you should know Before starting your vocabulary The ORC monitors the arrangement of the electronic parts of the bag warning light momentarily or continued - the system when the ignition switch is on the start OUSLY A single chime will sound if the light comes in position or on. Page 57 Some thing your vehicle 55 Impact sensors, located in the front impacts and help the ORC determine the appropriate response to events of front impact. The additional sensors of the ORC determine the level of airbags deployment and provide verification. Page 58 Each bag deploys independently, that is, a left lateral impact on the right side only displays the right bag. Page 59 Lieutenants to know before start your VEHICLE 57 If a Deployment Happens However, if you have not healed significantly within an airbag system they are designed to deploy when a few days, or if you have any blisters, consult your doctor Occupant Restraint Controller (ORC) detects a moderate-moderate- Page 60 58 things you need to know before you start your vehicle Turn on the interior
