Tiggly, a company that makes learning games of tablets for children in preschool, has what each publisher wants: an app close to the top of the App Store graphics. The app, called Sesame Street Alphabet Kitchen, is an early literacy tool that allows children to build words with cookie monsters in the form of "what else? Â, â, ~" biscuits. It is the product of a strategic partnership with sesame sesame, the non-profit organization behind the spectacle of popular children. Within a week of launch at the end of November, Alphabet Kitchen has been the 1 iPad app in categories for children and education, and ranked fourth overall in the App Store iPad. Â, â, ~ "We were very enthusiastic about the ranking," says Azadeh Jamaliano, Cofondan, Capo Tiggly, Learning Officer. And rightly so. With over 40,000 new apps released in the App Store every month, landing one of those areas Best points is not an accident. For Tiggly, it was the result of a lot of hard work and strategic. The soft launch before releasing a new app in the world, smart publishers tested the waters first with a tender launch to a Small Public. Â, â, ~ "Let's see where people are coming down, they don't have fun, or don't commit themselves well in the first 30 minutes and leave the app, then they change it", says Fabien-Pierre Nicolas, VP of Marketing and Communications at Mobile App Analytics Company App Annie. This soft launch can last from one to six months. Â, â, ~ "You really want that this first user experience is the best user experience as possible, Â, â, ~" says Nicolas. Â, â, ~ "It takes time." Tiggly did a version of this with the alphabetical cuisine. The company has the advantage of owning other apps already in the App Store, which can use for new products that promote new products . Â, â, ~ "Be a" AppsÂ, â, ~ "â app button to see other apps that come from Tiggly Â, â, ~," says Jamalian. Â, â, ~ "Before launching an app, we invent different icons for that app and see how popular one of those icons is, based on the number of clicks they get ... according to app annie, Â, â, ~ "A sign of a physical store or front window, your icon must explain the fundamental value of the app and encourage users to touch. - Looking at the App's title and icon, users should be able to discern what they arrived when they click. For example, he knew in Tiggzo, he wanted the cookie monster in the logo. The Blue Furry Cookie Fanatic fanatic is one of the most popular show muppets, and using the face of him was a quick and clear way to report to parents that the app arrived with the Sesame Street approval stamp. Â, â, ~ "Ditoday parents grew up with the characters of Sesame Street themselves. ... Which means that parents want their children to play and learn even with sesame Â, â, ~" says Jamalian. They gave the character of a chef hat to report that the children would return to the character. Perform something that NewApple has an editorial team specifically dedicated to presenting new apps. These gatekeeps have high standards ... both Apple and Google have entire optows full of requirements the new apps should meet if they want to be approved, or, above all, promoted as an app for Â, â, ~ ". Only a handful of app are Â, â, ~ "Prepared" every week, but the payoff can be enormous. Â »Â« The great features banners are so important, "says Nicolas. Â, â, ~ "will take you over a million installations, and if you had to put a price tag on a million installations, it is \$ 2 million value. A lot of semi rounds that start-ups are increasing They are \$ 1.5 million, so we talk about the equivalent of a large round seed from Apple or Google, delivered to you. One of the major Apple quality seeks when considering the Apps to a feature is The App Store has already more than 80,000 education apps, so he knew so that Tiggly had to offer something that others didn't do a lot of research and knowing where they are the areas of improvement, Â, â, ~ "says Jamalian . Â, â, ~ "What is the type of content is already saturated? That initial search you have to do alone, and helps with your relationship with Apple because they know that you Tiggly's mission is to create educational apps that have a physical game element to them, so what makes the app of different cuisine alphabet is its compatibility with intelligent toys in Tiggly - the physical letters of children They can stamp on the iPad screen as cookie cutters make words. Â, â, ~ "We bring the best of physical and digital play together to create a new game experience for children that you cannot necessarily replicate with toys or apps yourself Â, â, ~," says Jamalian. Work the Awards circuit the effective way to attract attention to a new app is winning prizes and get excellent reviews, but you need to know what competitions enter and which publishers are looking for. Â, â, ~ "Example example, there is a review of children's technology (CTR) Editor's Choice Award Award, and one of the editors is a well-known guy in the App industry," says Jamalian. Â, â, ~ "It is important to know what kind of design concentration has in mind when evaluating your app.Â,Â» Tiggly obtained an incandescent review from the CTR, and received two other remarkable prizes since the time Alphabet launch. Launchaccording in Nicolas in App Annie, November and December are traditionally the worst months to release a new app on the market. Â, â, ~ "Dimajor advertisements and retailers, the big boys, spend a massive amount of money on the mobile phone Around Christmas and Thanksgiving, which prevents you from making an efficient acquisition, "says Nicolas. Neophytes have a better blow in January, when many people are breaking into new phones and they are more likely to be on hunting for new apps To try the course, this means that Tiggly's alphabet's cuisine is a bit a little anomaly with its success story in November and without a doubt the reputation of Sesame Street had a lot to What to do with that. Â, â, ~ "DELSAME LABORATORY is legendary in the media and in children's education, says Jamalian says. Â, â, ~" [parents] trust that the time their children spend with sesame is educational, Playful and full of laughter.Â, Â The App Store was and is a revolution: a unique place on every iPhone and iPad where you can find all apps and every game for iPhone and iPad. From it, you can browse or look for new apps, download and buy new games, add to your wish list, share and send to friends and family, redeem gift certificates and promotional codes and get refunds when and you need it. And here's how to use it! Apple has announced a series of changes that come to the App Store by the end of the year with the release of iOS 11. This starts with the new new design for the store. Now it has new more focused cards, including the new tab today, which tells you all the apps and essential games, also offering app advice, tricks and more. Here is everything you need to know. App Store FAQ: all you need to know how to download apps and games from the App Store get the first iPhone or iPad is just the beginning. Thousands of developers have made over one million apps and games that can fully turn the device you are holding in your hands. With every new app you can become your constant Facebook friend, your gateway for Snapchat, a tool to learn new languages, a way to dust over math or science, ticket for car services, a personal scanner, a way to Change the documents on the race and, of course, an incredible portable game console. All you have to do is start! How to share and save apps on the App Store as a gift and redeem apps on the App Store How to get a refund for App Store purchases If you experience a problem with any app or games you purchased from the App Store request a refund directly from Apple. You will have to have a valid reason for the request It is intended to be a way to get free trials or short-term use ... but if you buy something by mistake, buy the wrong thing, or take the wrong thing, or it's your money back. How to get a refund for App Store purchases If you have problems using the App Store or any questions that you have not received answer, please let me know in the comments! The App Store on on Mac is the gateway to expand your program library. The days are finished to buy computer programs from electronics stores; You can only download everything you need from the App Store. Some things are free; Other things you will have to pay. All you need is an Apple ID and go away. Here's how to start with the Mac App Store! As you log in with your Apple ID before you can download any application, you need to log in with your Apple ID. Start the App Store from the dock or finder in applications. Click Log in in the lower left corner Enter your Apple ID and password. Click Log in or Typing Return on the keyboard. Boom. You are in. How to view and edit your Apple ID account Before downloading the apps, we advise you to be sure payment and information about the country are in order so that you don't need to waste time with these things as you excited Download applications. Start the App Store from the dock or finder. Click the name on the left side of the screen. It should be in a corner. Click View information in the upper right corner. From here you can change the credit card data, billing address, country, and nickname. If you change your nick, this is displayed that way in the Game Center. Type the information requested in the fields of the item you are changing. Click the Blue Button Done when you are satisfied with the changes! How to download an application or a game if the goal is productivity or time loss, the App Store has the application for you, Just download it. Here's how: Start the App Store from the Dock or the Finder. Search for the application you want to download. You can view applications in the foreground or search through category, the title, and more. Click the price if it is a paid app, or click Get if it is a free application. Click Buy App if you are a paid app, or click Install App if it's free. Enter the Apple ID password. Click Buy. (Buy will appear even if the application is free). How to set up automatic applications or games on another Mac If you download multiple Mac applications and games, you can activate automatic downloads to have all your applications with you on all your Macs! Start the App Store from the dock or finder. Click App Store in the menu bar at the top left of the screen. Click Preferences. Click the check box next to the app downloaded on other Macs. How to find an app or a game after it was installed after downloading an application, obviously want to find and use it. That's how! Open a finder window. Click Applications in the left folders. Click the Settings button at the top of the window. It looks like a gear. Click Arrange for. Click Date Added. This will move the most downloaded applications recently at the top of the list. How to view and re-download the previously purchased applications and games if you have already paid for an app, you don't need to pay for this new. So if you fail, you can simply re-download and you won't have to look away! Start the App Store from the dock or finder. Click on the name in the lower left corner of the window. Click Download next to the application or a game you want to download again. How to check for updates of Mac App Store Applications It is a good idea to make sure you have the most recent version of all the apps you download. Here's how to check: Launch the App Store from the Dock or the Finder. Click Updates to the left side of the window. Click Update next to each application you want to update, or Click Update All.
