Knowledge skills and abilities examples. Knowledge skills and abilities nursing. Knowledge skills and abilities list. Knowledge skills and abilities resume example.

If you care about animals, you may think that a career in zoology is right for you. However, you need more than a love for creatures to be a zoo. ZooLogs study, analyze and observe wildlife to develop preservation strategies. They need skills in science, thought and communication, as well as fansical resistance to work in the field. Zoologs need a way to apply rules and scientific methods to solve problems. They perform scientific tests and experiments, such as drawing blood from wild animals to track diseases or following animal flocks to monitor population tenders. ZooLogs should understand the science of computation because they use geographic information systems, software modeling and other advanced programs to do their jobs. In addition, the education of a zoo ll is heavy in courses in cellular biology, anatomy, ecology, chemistry and physical. In addition, the complex data analysis requires knowledge of mathematics and statistics. Zoologs should be able to think critically, or use sound raciocanium to draw conclusions of test results and scientific observations. They also need to find the best soluations for diseases, loss of habitat and other wildlife threat. They should apply the logic to find the strengths and weaknesses in ideas. They should combine different sources of information to draw conclusions and evaluate the costs and benefits of an action. They need to focus while carrying out studies, and they have to think about new ideas to solve old problems. Zoologs call deductive reasoning, or the ability to apply general rules to specific problems to find sensible answers. They also use inductive raciocanium or the ability to combine information to draw general conclusions. ZooLogs give presentations to colleagues, managers and legislators. They educate the public in the conservation and management of wildlife. They write scientific documents and relatives to explain their discoveries. They work on research teams with other scientists to monitor environmental effects on animal populations. They partner with the policy formulators to bring together management plans and conservation of wildlife. To deal with these responsibilities, zoologs should be able to hear others, understand them and ask questions. They should be able to express their ideas clearly when speaking or writing. Fansical resistance is essential. Many zoologs spend weeks or months at a time in the field by bringing information and studying animals in their natural environment. ZooLogs usually travel to remote locations to conduct field surveys. They must complete their research in hot and cold climates and in all weather conditions. Zoologs need emotional resistance as well, because the work can come with chronicles and high stress situations. Podicogers specialize in diseases and injuries that affect the foot. In order to become a pod, candidates must gain a diploma of a podiatrical medicine, which takes about four years to complete after graduation teaching, and then complete a three year residence. Some podiatric specialties also require candidates to complete a communion that can last, from three additional years. Successful podiatrists share similar skills and skills. Interacting with patients is a chronic part of the podicog work. Patients can worry about their conditions and uncertain of their prognosis. Those faced surgeries may be nervous or even afraid, and it is up to the pod to explain the procedure and calm any trepidation. Podiatrists need the ability to relate to patients, understand why they may have certain reactions. The effective communication between podry and It is essential, which means that the podicogs are not only need to speak in a way that the patient can understand, but also to hear what the patient is saying. Podiatrists may also need to interact with the support team or other doctors. Like all physicians, the podules apply the principles of science to reach a diagnostic and treatment plan. They should be to be To reason inductively and deduced by applying general rules, but as well © m combining seemingly related events in the £ o to reach a conclusÂ £ o. This may include the ability to provide that a problem may arise. A Sometimes the podÂ³logos should take decisÂ³pes based on the cost in money and stress in the patient's option of a £ o versus the benefits that the patient can make and then make a judgment about whether A © justified a course of aÂ³Receiving\$ the £. Podiatristas should be directed to the details. They should carefully review the Landmarks mÂ³ dico of a patient, for example, to get clues about the patient's current problem and prevent potential conflicts with proposed treatment plans. The My Information must be registered with the £ precision the patient's framework for future purposes referÂ³ncia and billing. Podiatristas should be able to focus on the My Information provided by the patient as symptoms or current medications, without being distracted. Much of the podÂ³latistas of £ informaÂ³Â the need to be Available in written form. From his initial £ Education to decipher graphs of patients, podÂ³logos should be able to understand the written word. They Tamba © n must be able to understand articles in periÂ³dicos mÂ³ © physicians in the £ Interface to new procedures or drugs, if they are to keep up with advancements. Â Sometimes they may need to provide patients with written instructions, and should fazÂ³ it in a comprehensible way. They Tamba © m must enter My Information in graphs of patients so that others can entendÂ³ it. In May 2012, the Statistics Bureau of the U.S. Labor reported an annual salÂ³rio mÂ³ © dio of \$ 132,470 for podÂ³³logos. The salÂ³rios mÂ³ © dios were higher in New Hampshire and Colorado at \$ 186,940 and \$ 182,140, respectively. The mÂ³ © salÂ³rios lower dios were in New MÂ³ © xico, to \$ 102,350, and South Carolina, US \$ 103,800. The recreational therapists plan and supervise recreational programs for the disabled or those suffering from diseases. They incorporate different activities like mÂ³³sica, danÂ³sa, sports, games and arts and crafts. Although usually work indoors, as in reabilitaÂ³Â centers £ o, or Special Education departments £ o, they can travel on field trips with clients. To keep your safe, active and motivated cobranÂ³sas, they must have special skills. Employers prefer to hire recreation therapists Legal Specific skills and personal qualities. The compaixÂ³ £ o Â³ © arguably the most important, because therapists must show kindness, patience and sympathy, as clients and their families cope with Conditions physically and emotionally painful and stressful. They must communicate well, listen to problems and customer preocuparÂ³Â³pes, and speak persuasively to give instructions or encouragement. The lideranÂ³sa Â³ © an important quality because therapists must plan activities and then be able to realizÂ³ them efficiently schedule and orÂ³samento. Finally, the thought cratic allows professionals to find Solutions to problems and adapt activities Â³ s customer skills. Recreational therapists learn their skills by getting a bachelor's degree in Recreation £ the terapÂ³utica or related fields. This £ disponÂ³veis the colleges and universities atravÂ³ Â³ s certificate programs by the National Council of the Recreation CertificaÂ³Â £ £ the TerapÂ³utica. His subjects cover human anatomy, terminology mÂ³ © hint and psiquiÂ³trica, ratings, reviews characteristics of diseases and deficiÂ³ncias, and use of terapÂ³uticos devices such as wheelchairs and depÂ³³sitos. A estÂ³gio A © Necessary for diploma because it provides prÂ³tica Experience in a field where professionals should interact one on one with indivÂ³duos. From the time of the publicaÂ³Â £, Oklahoma, North Carolina, New Hampshire Utah and recreational therapists required to perform a licenÂ³sa, although requirements vary according to the Most employers hire therapists who are certified because they document that they have skills that are tall to the pattern of Industry. The National Council offers credentials specialist in therapeutic recreation certified for therapists who have a supervised stage of at least 480 hours and A written examination. The council also offers certification in five specialty areas: geriatrics, behavioral health, physical rehabilitation, development deficiencies or community inclusion services. Leisure therapists were planned to show employment increases from 17% in relation to 2010 to 2020, which are larger than 14% designed for all jobs in all industries, but less than expected 26 % for all health diagnosis professionals and deals. Demand will come from a baby boomer population that will need therapists to help with age-related conditions such as traces, phantic capacity declining and mental issues. In May 2011, recreational therapists had a US \$ 42,940 per year, or \$ 20.65 per hour, with high above US \$ 65,040, or US \$ 31.27 per hour and low below \$ 25,620, or \$ 12.32 per hour. Nursing care facilities were the largest employers, with 4,560 total positions of 19,650 therapists and US \$ 37,980 million annually, or \$ 18.26 per hour. However, the best salary were in the federal government in US \$ 64,900 per year, or \$ 31,20 per hour. 1 of 24 Mudroom a dam without confusion allows the rest of the house to remain free of disorder.
